

Tomas Agustin Salto

Web Developer | Front-end | PHP/Laravel | Full Stack

tomasagustinsalto@gmail.com | LinkedIn | GitHub | Neuquén, Argentina | Remote

SUMMARY

Product-minded web developer focused on performance and practical delivery. I build clear interfaces, internal tools, and full-stack applications with React, Astro, PHP, Laravel, MySQL, and APIs. My portfolio and public projects show hands-on work across frontend, backend, deployment, data modeling, and automation, with maintainability as a core priority.

TECHNOLOGIES

Frontend	JavaScript, TypeScript, React, Astro, HTML5, CSS3, Tailwind CSS, Vite
Backend	PHP, Laravel, Node.js, FastAPI, REST APIs
Databases	MySQL, SQLite, SQLAlchemy
Tools	Git, GitHub, Docker, Linux, Postman, Figma, Ollama

FEATURED PROJECTS

Pallet Control Laravel, PHP, MySQL, APIs | github.com/tomassalto/pallet-control

Full-stack application for operational control and process management. Shows real business logic, traceability, a custom backend, and internal-tool workflows.

MiColeNQN React, TypeScript, APIs | github.com/tomassalto/mi-cole-nqn

Modern application focused on user experience, interface structure, and frontend organization. Shows product judgment and disciplined data consumption.

MangaVault React, Vite, FastAPI, SQLAlchemy, SQLite, Ollama | github.com/tomassalto/MangaVault

Local manga/comics library with a web reader, custom backend, local asset serving, and OCR/LLM pipeline. Separates a safe public demo from private personal usage.

CommitGPT JavaScript, Node.js, CLI, Git | github.com/tomassalto/commitgpt

Developer-productivity CLI for Git workflows. Reflects interest in tooling, automation, and improving the developer experience.

EXPERIENCE

Front-end Developer | Neowyze | May 2024 - October 2024

- Built websites and landing pages with Astro, React, and Tailwind, prioritizing performance, responsive design, and maintainability.
- Migrated existing pages from HTML, CSS, and JavaScript into more modern and reusable structures.
- Shipped client-requested changes with attention to code quality, visual consistency, and delivery speed.

PHP Developer | Eximo Software | September 2022 - December 2022

- Implemented forms, views, and connections between business logic and SQL databases.
- Worked across frontend and backend on admin workflows, validations, and data persistence.

EDUCATION

University Technician in Web Development | Universidad Nacional del Comahue | 2020 - 2023 | Neuquén, Argentina

LANGUAGES

Spanish: native | English: upper-intermediate, fluent technical reading and professional written communication
